REPORT NO

THIS IS UNEVALUATED INFORMATION

25X1

1. The large assembly hall of the factory under construction in Snina (W 48-59, E 22-09) collapsed in March 1953 because of the sandy ground on which it was being built. There were no casualties.
2. A group of apprentices from Galovo, Slovakia,¹ was observed in Snina prior to March 1953.
3. Between 1950 and 1952, CKD Slany employed a group of about 10 young apprentices from Snina. They were members of the State Labor Reserve. The impression was gained from members of this group that CKD was building a sister branch in Snina and was preparing the group of apprentices for jobs in the CKD Slany plant.
